PACK

Microgreens Mat

PIPPA GREENWOOD
EXPERT ADVICE
TIPS & VIDEOS
WWW.HAXNICKS.TIPS

Biodegradable natural plant fibre growing mats
Simple to grow, from sowing to eating in 7 to 21 days
Place in a seed tray, scatter seeds, mist with water

Fully compostable after use and designed to fit the Haxnicks Bamboo Seed Tray
for truly sustainable growing

Microgreens are nutrient rich mini veg that you grow in your kitchen. Packed with antioxidants they are ready to eat in just days and add flavour and fine dining style to any meal.

The Haxnicks Story

Our story begins with a small boy in a garden, helping (or hindering) his grandfather to tend the plants. The boy lifted one of Grandpa Haxnicks' last remaining Victorian glass cloches, but being clumsy as small boys can be, by the time he'd asked what it was for, the cloche had somehow shattered.

Grandpa Haxnicks took it well, and kindly explained to the boy how the curved shape of the cloche captures sunlight to help the plant grow, and also how it was impossible to buy them anymore. The boy grew up with his grandpa's love of growing, and one day he decided to make some more cloches for him out of plastic – cheaper and less breakable. Grandpa Haxnicks was delighted, and soon they started making the cloches for other people – and so the business began.

More exciting new products were designed and added to the range, and before long Haxnicks became well known for its quality and original ideas. Many keen gardeners have now come to trust the Haxnicks brand above all others.
